

International Efforts

In addition to Canadian resources on young drivers, there are many publications and articles from other countries that provide a great deal of information on the subject, some of which we have listed below.

TIRF is also interested in obtaining international contacts to place in this document as well. If you would like us to include you as an international contact on young drivers for your country, please e-mail us at: tirf@trafficinjuryresearch.com. Additional publications or articles can also be submitted by way of this address.
